

BPMN PROJECT 1

HR HIRING PROCESS MODELLING AND DIAGRAM

SUMMARY

This document captures the complex operational workflow of an HR recruitment pipeline. Using Lucidchart, I digitized and standardized the end-to-end process into a formal BPMN 2.0-compliant map, applying standard visual shapes such as decision gateways with explicit branching logic and active process tasks. Lucidchart transformed a manual sketch into an intuitive, error-free visual workflow that delivers instant clarity and ensures cross-functional alignment.

Tools used: Lucidchart, MS Word

Query

The primary goal was to draft a standardized, professional digital flowchart of 'HR Hiring Process' for better visual understanding.

Below is the exported diagram of the finalized HR Hiring Process, created with Lucidchart :
