

E-COMMERCE SALES & CUSTOMER ANALYSIS

This dashboard constitutes of three charts:

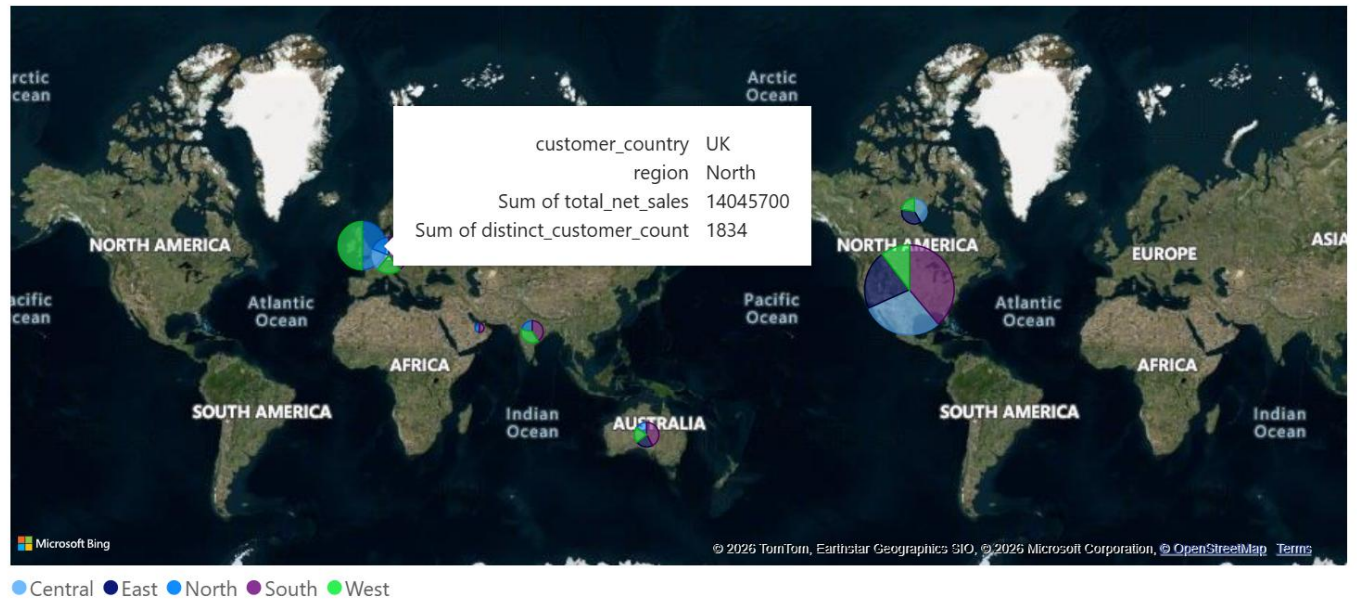

1. Map (Top left corner)

International Sales Map View: Displays geographic concentration of revenue, utilizing embedded regional breakdowns to show how different sales territories drive performance within each country.

Total sales in every country

Region wise net sales in every country

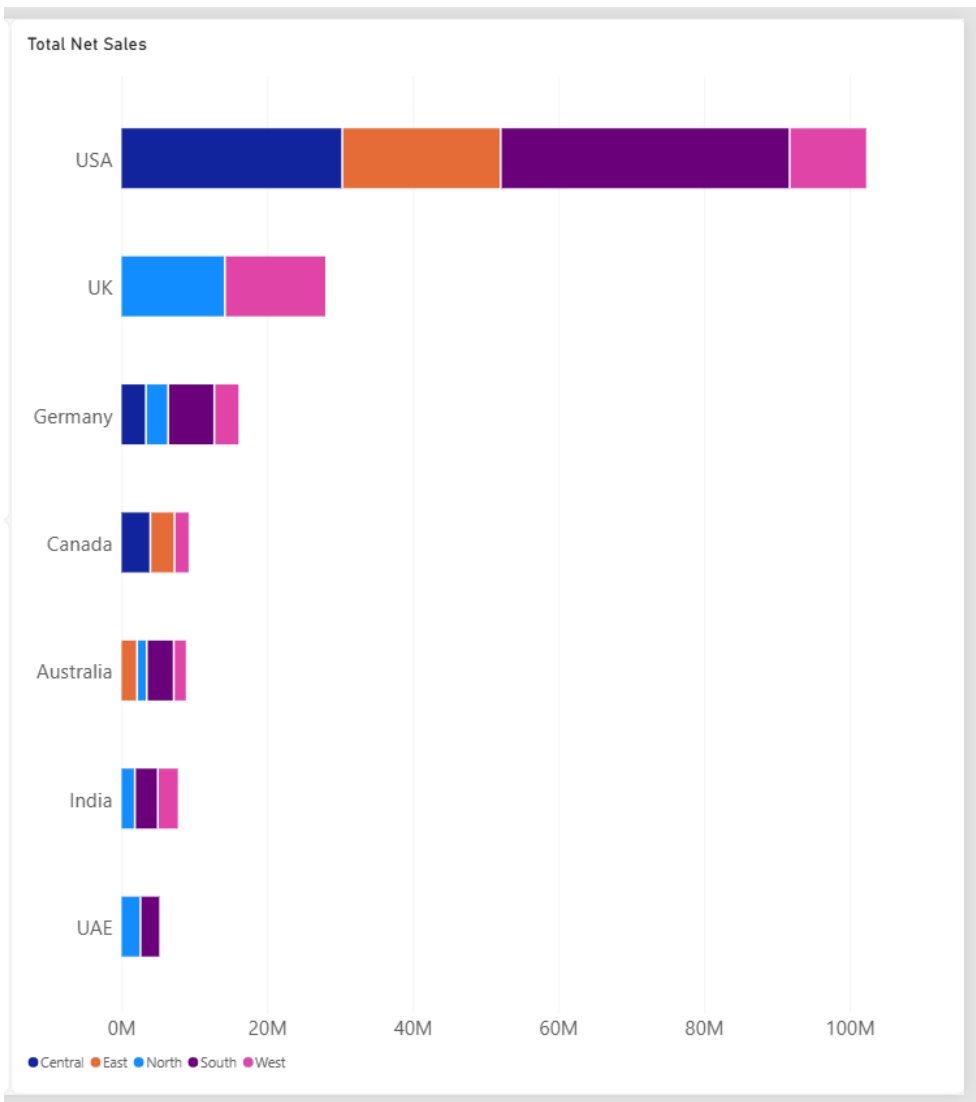

Total sales in every country

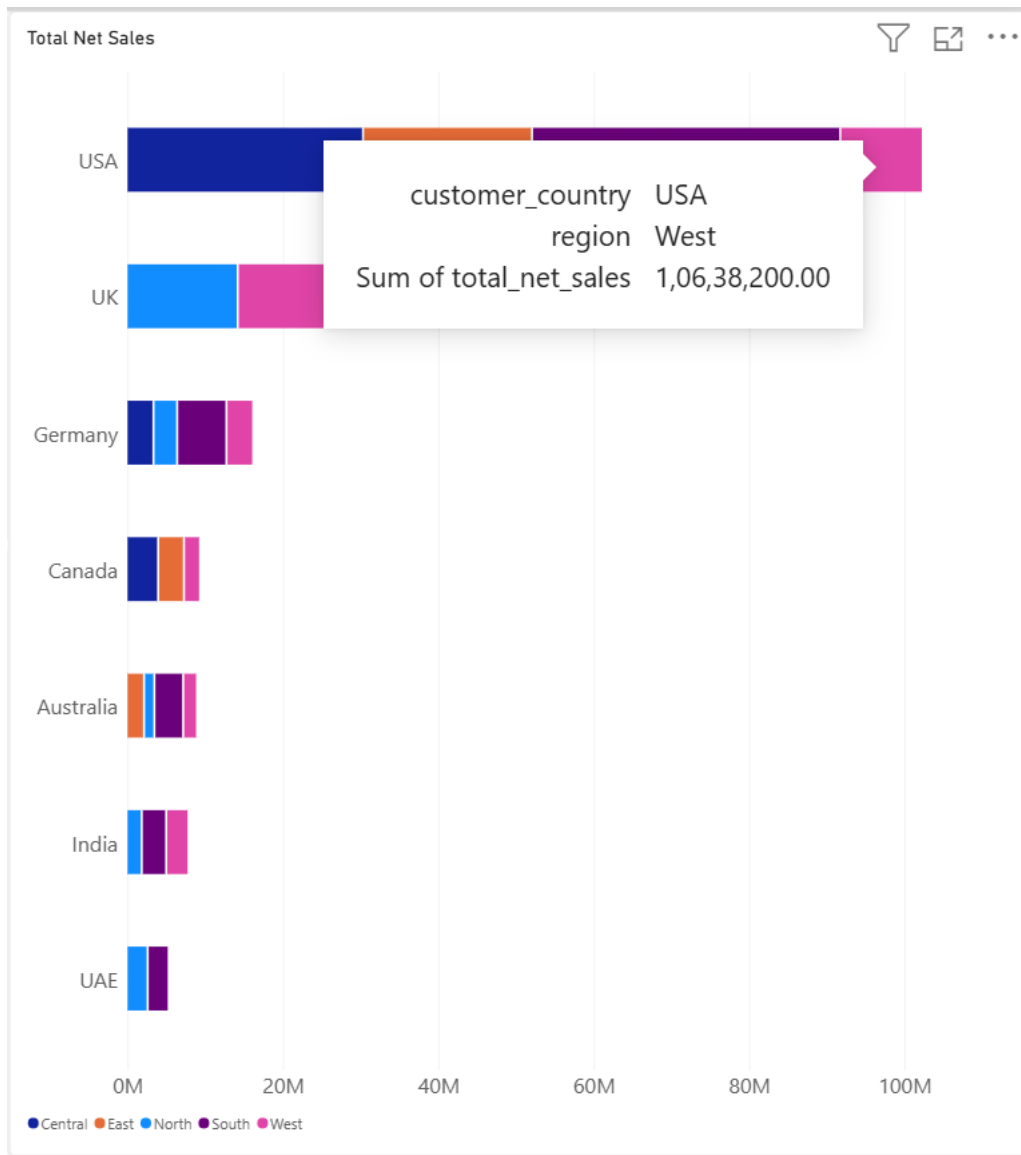

Region wise net sales in every country

2. Stacked bar Chart (Right half of the page)

Comparative Regional Performance: A horizontal stacked bar chart ranking countries by total net sales. This view highlights market concentration in countries while illustrating the proportional sales distribution across internal company regions for each market.

3. Slicer (Bottom left corner)

COUNTRY NET SALES

customer_country, region and total_net_sales

- > ☐ Australia
- > ☐ Canada

- > ☐ India
- > ☐ UAE
- > ☐ UK
- > ☐ USA

Market Selection Slicer: Provides seamless, user-driven scoping to filter global sales metrics by target country, ensuring dynamic responsiveness across the entire report layout."

COUNTRY NET SALES

customer_country, region and total_net_sales

- ▼ ☐ Canada
 - > ☐ Central
 - ▼ ☐ East
 - ☐ 33,18,200.00
 - > ☐ West
- ▼ ☐ Germany
 - ▼ ☐ Central
 - ☐ 32,01,650.00
 - > ☐ North

Hierarchical Country-to-Region Slicer:

- **How it works:** Structured as an expandable drill-down list (Country → Region → Sales Value), allowing users to expand high-level international markets to expose granular sub-regions and exact net sales figures
- **User Experience & Interactivity:** This hierarchical design transforms a standard static filter into an intuitive exploration tool. It prevents interface clutter by hiding lower-level details until requested, while giving stakeholders the flexibility to scope the entire report from a macro global view down to a specific regional territory with a single click."
